

God's Plan for the Sun

God knew that man would need the earth to live on. He also knew that there would be the need for the sun to warm the earth. So God arranged that during His creation, He would make the sun. The sun is a huge ball of hydrogen gas which is in a state of continual explosion. The sun is big enough to contain over a million earths.

The sun is the source of all light and warmth for the earth. Without the sun to give its light and warmth, man could not live on the earth. All the fruits, vegetables and grains that we eat use the light energy from the sun in order to grow. Without the sun's light, none of them would live and we would not have anything to eat. Even the animals that provide us with food could not live because they all eat the things of the vegetable life.

not

We could not live on the earth without the warmth of the sun. If we did not have the sun's warmth the earth would be a solid ball of ice. All of the oceans would be frozen and nothing could live on the earth. God did a marvelous thing in the way that He created the universe.

Next Week – The Earth

Next week we will begin to look at many wonderful things about the earth that God created for

God's Creation

- Lesson Twelve -

The Heavens and the Earth Are for Man (1)

I. Overview.

Now that we have seen the seven days of God's creation, we will begin looking more closely at different items of God's creation. The first things that we will consider are the wonderful heavens and earth and how they were created especially for man. This week we will look at the heavens and the sun.

Zechariah 12:1 says

“The burden of the word of Jehovah, Who stretched forth the heavens and laid the foundations of the earth, and formed the spirit of man within him”.

God's Desire is for Man

In the beginning God was alone. He did not have anyone with Him, but He knew what He wanted. God knew each one of us and desired to have us with Him. God knew just who should be your parents and just where and when you should live. He also knew that you would be in the church. But God knew that we needed some place to live. This is why He created the heavens and the earth. The heavens and the earth are both very beautiful. We can learn many things about God and about how He wants us to live by looking at the heavens and the earth.

Memory Verse

(Genesis 1:1)

The Heavens Is So Big

The first thing that God created was the heavens. Have you ever looked into the sky in the night time? It seems like you can see so far. There are so many stars that are very, very far from the earth. Even so, we can actually only see a small part of the heavens. We also call the heavens “the universe“. No one knows how big the universe is, but we do know that God created it. We also know why He created it. He created it so that He could place the earth in it for

Color this picture with your colored pencils.

There are billions of stars that we can see by using our eyes and by using telescopes. There are probably even many more that we cannot see because they are too far away. Only God knows how big the universe is. As men, we can only see a small distance. Yet even the farthest reaches of the universe were created by God with man in mind. He carefully planned the universe as the best possible place for man to live in.
