#### I. Overview.

**I**n this lesson we see how God made us physically. He made us with a body, including our head, body (trunk), and limbs. Our head contains most of our senses: sight, hearing, balance, smell, and taste. By our senses we can perceive the world around us.

God also created us with the most wonderful "computer" ever designed in the universe, our brain. Our brain enables us to interpret and understand all the information that our senses provide. Our body was created as a "house" for us to live in. Also our

body is our servant through which we may serve the Lord. Genesis 2:7 says **"God formed man from the dust of the ground..."**; what God formed from the dust was man's body.

#### II. Scriptures for Memory.

**1 Cor. 6:20**

***"For you were bought with a price; therefore glorify God in your body."***

### III. Lesson.

#### Our Bodies are a Marvelous Creation

Our human bodies are a marvelous creation of God. Every part is a small masterpiece. Some doctors spend their whole lifetime to understand just one part, like the eyes, or one organ, like the heart. Our eyes are one of the most wonderful parts of our bodies. Inside our eyes are over a hundred million individual light sensors. Each one is sensitive to only one color of light. Together they send our brain billions of signals which the brain uses to put together a moving and colorful visual image. Actually we are just sensing light waves in the air. But we can put them together into something that we see.

*Our eyes are one of the most wonderful parts of our bodies.*

#### Our Bodies are Our “House”

Our bodies were actually created by God to be a sort of “house” for us to live in. We live in our body, we’re always “at home”. Our bodies serve us so that we can do the things that we want to do. When we want to move our arms, our body responds by moving our arms. When we want to speak, our body makes the sound. Our bodies were created so that we could serve God. By serving God, we can express Him, which is His purpose in creating man. We should always care for our bodies and keep them holy because they were created for God. We should always honor our bodies.

### Our Brain is the Most Wonderful “Computer”

Inside our head is our brain. It is only about the size of a grapefruit, but it more capable of doing things than a very large computer. In fact, it was the human brain that was able to think up a computer. This proves that our brains are more powerful than a computer. Our ability to use our brain is very important to God and is a strong sign of our being created in God’s image and likeness. We should always treasure our brain and do our best to learn as much as we can whenever we are being taught. We should not lose any opportunity to make our brain more useful.

#### --- Questions for Discussion ---

1. What did God use to create man’s body?
